## **Advanced Memory Optimization Techniques For Low Power**

Advanced Memory Optimization Techniques for Low-Power Embedded Processors The design of embedded systems warrants a new perspective because of the follow-ing two reasons: Firstly, slow and energy inefficient memory hierarchies have already become the bottleneck of the embedded systems. It is documented in the literature as the memory wall problem. Secondly, the software running on the ...

to product different techniques are used in. 4. different problems. Purpose of formulation is to create a mathematical model of the optimal design problem, which then can be solved using an optimization algorithm. Figure 1 shows an outline of the steps usually involved in an optimal design formulation. 5. Design variables: The formulation of an optimization problem begins with identifying the ...
